

belloo-combi-enso

The new standard is here!

Discover the new patented bag dispenser system from belloo

Symbol of the circular economy

The Enso circle is a symbol of Japanese calligraphy and literally means 'circular shape'. It stands for awareness and mindfulness.

Everything that happens on our planet is part of a cycle and is interconnected. The new circular dispenser system promotes the respectful use of our planet's resources.

Innovation for you

Thanks to the dual use of the **transport carton as a refill pack**, not only is your storage optimised, but the dispenser capacity is also increased to up to **2,500 bags**.

Place the box with the loose packed dogwaste bags into the container.

Remove the pre-perforated cardboard opening. Done.

Ecology done the right way!

The signal-coloured belloo recycle bags guarantee **sustainability** at the highest level.

The 'Blue Angel' eco-labelled bag is manufactured in Europe. This makes the **belloo recycle PURE** the **most environmentally friendly bag on the market**.

Ask our team for personalised advice.

We look forward to supporting you in optimising your environment!

Your advantages

- Easy refilling
- Box directly in the dispenser
- Dispenses up to 2500 bags
- No block edges
- No punching holes
- Customised insert size
- Customised printing
- Easy bag extraction

Re:thinking

- Less material used
- Less water consumption
- Less energy consumption
- Less CO2 emissions
- Reduction of waste
- Can be recycled

*100% Innovative
100% Recycling made
from Swiss used plastics
100% Developed and
produced in Switzerland
100% for our planet
100% Sensible
100% belloo*
